

Retail Environmental Compliance

New approach. Established Expertise.

Retail Environmental Solutions™ was created to provide innovative solutions to the unique environmental compliance challenges faced by the retail industry. Leveraging the lessons learned in serving retailers since 2003, the company couples the basic strategies of modern retail – innovative systems, efficient prototypes, price-competitiveness – with the traditional values of customer service, quality, value and entrepreneurship.

Helping retailers develop executable compliance programs takes not only technical and regulatory knowledge, it also takes a practical approach and experienced judgment. Whether it's helping you prioritize and roll out your waste and compliance programs to high enforcement risk states or developing processes and a system to manage compliance execution at stores, distribution centers, data centers and corporate & support facilities, Retail Environmental Solutions™ can help you manage your compliance obligations and mitigate associated risks.

*How do you manage
damages that become
hazardous waste?*

**“With thousands of
facilities, environmental
compliance is an inch
deep but miles wide.
That’s why Retail
Environmental
Solutions™ provides a
practical approach.”**

Practical Solutions. Practical Pricing.
